## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, 21, 23-27, drawn to a document information communicating system and method for sending document information which is divided into a plurality of pages, classified in class 358, subclass 1.15.
  - II. Claims 16-20, drawn to a document information communicating system and method for sending document information which has a plurality of display forms, classified in class 358, subclass 451.
  - III. Claim 22, drawn to a document information sending apparatus for sending two types of document information, classified in class 358, subclass 453.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II and III are related as combination and subcombinations. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because it does distinguish different formation of the document as character of bitmap, or different display formats of the document. The subcombination II has separate utility such as a sending device for repeatedly sending the document information in a plurality of display forms and changing the display form one after another. The subcombination III has separate utility

Art Unit: 2622

such as a first dividing device for dividing each page of the document information formed by a plurality of characters into a plurality of blocks, a second dividing device for dividing each page of the document information formed by bitmap data into a plurality of blocks.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
